

## **REVIEW OF THE IMPACT OF HB1150's IMPLEMENTATION**

**From The Office Of State Auditor  
Claire McCaskill**

**Report No. 2004-25  
March 31, 2004  
[www.auditor.mo.gov](http://www.auditor.mo.gov)**

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

March 2004

**The following report contains information on taxing authorities in St. Louis County.**

State law requires the Missouri State Auditor to annually check all taxing jurisdictions throughout Missouri as to their compliance with the tax limitation provisions of state law including the Hancock Amendment.

As a follow up to the Review of 2003 Property Tax Rates, we reviewed the impact of House Bill No. 1150, Second Regular Session, 91st General Assembly after its first year of implementation.

The objective of this review was to analyze the impact of the first year of implementation of HB1150 in St. Louis County. The total revenue allowed by HB1150 for the 268 levies affected in St. Louis County was \$1,273,044,631 and is substantially the same amount of revenue as allowed under the prior method. HB1150 appears to have had a limited overall impact on total property tax revenues but shifted \$12.8 million of taxes from residential property tax payers to commercial, agricultural, and personal property tax payers.

**STATE AUDITOR'S REPORT**

## CLAIRE C. McCASKILL Missouri State Auditor

Honorable Bob Holden, Governor  
and  
Members of the General Assembly  
Jefferson City, MO 65102

The State Auditor's Office is required to annually review local property tax rates of all taxing authorities in the state, (see report #2003-124). House Bill No. 1150, Second Regular Session, 91st General Assembly revised Section 137.073, RSMo, to require a separate calculation of each tax rate by subclass of property (i.e., residential, agricultural, commercial, and personal property). Implementation of this legislation began in St. Louis County in 2003 and is scheduled to begin statewide in 2005. This separate review was necessary because the impact of this legislation was not included with our annual review of the 2003 property tax rates.

The objective of this review was to analyze the impact of the first year of implementation of HB1150 passed by the legislature in 2002.

The total revenue allowed by HB1150 for the 268 levies affected in St. Louis County was \$1,273,044,631 and is substantially the same amount of revenue as allowed under the prior method. HB1150 appears to have had a limited overall impact on total property tax revenues but shifted \$12.8 million of taxes from residential property tax payers to commercial, agricultural, and personal property tax payers.

A handwritten signature in black ink that reads "Claire McCaskill".

Claire McCaskill  
State Auditor

January 11, 2004 (fieldwork completion date)

The following auditors participated in the preparation of this report:

Director of Audits: Thomas J. Kremer, CPA  
Tax Rate Supervisor: Becky Webb

## EXECUTIVE SUMMARY

## **EXECUTIVE SUMMARY**

### **Background**

The State Auditor's Office and county officials assist local government officials in determining the data necessary to complete the tax rate computations. Taxing authorities are required to file data supporting the proposed property tax rates with the county, using forms prescribed by the Auditor. The data is reviewed and a finding is returned to both the county and the taxing authority advising whether the proposed rates comply with Missouri law.

House Bill No. 1150, Second Regular Session, 91st General Assembly revised Section 137.073, RSMo, to require a separate calculation of each tax rate by subclass of property (i.e., residential, agricultural, commercial, and personal property). Implementation of this legislation began in St. Louis County in 2003 and is scheduled to begin statewide in 2005.

### **Results**

The State Auditor received substantiating data and reviewed 320 tax rates for the 173 taxing authorities in St. Louis County in 2003. This review excluded the 52 debt service levies in St. Louis County, as this calculation was not affected by HB1150. To review the impact of the implementation of HB1150, we reviewed the 2003 property tax rate calculation for the 268 levies in St. Louis County that were affected by the new legislation. See Appendix I for a listing of the levies included in this review.

The total revenue allowed by HB1150 for the 268 levies affected in St. Louis County was \$1,273,044,631 and is substantially the same amount of revenue as allowed under the prior method. HB1150 appears to have had a limited overall impact on total property tax revenues but shifted \$12.8 million of taxes from residential property tax payers to commercial, agricultural, and personal property tax payers. Table 1.1 below shows the breakdown of the difference in the allowed revenue due to HB1150 and the percentage of total actual revenue by subclass. The largest percentage change in allowed revenues was 10.25% in agricultural, but its overall affect is minimized since agricultural only represents 0.04% of the actual revenues levied.

**Table 1.1: Differences in Allowed Revenue Due to HB1150 & Percentage of Total Actual Revenue by Subclass**

<b>Subclass</b>	<b>Difference in Allowed Revenue</b>	<b>Percent of Total Actual Revenue</b>
Residential	1.86% Decrease	54.70%
Agricultural	10.25% Increase	0.04%
Commercial	1.32% Increase	23.51%
Personal Property	3.27% Increase	21.75%

In general, HB1150 appears to have decreased more residential levies, had little impact on agricultural levies, and increased more of the commercial and personal property levies. Table 1.2 below shows the highest percentage of levies impacted by HB1150 for each subclass of property.

**Table 1.2: Highest Percentage of Levies Impacted by HB1150 for Each Subclass of Property**

Subclass	Percentage & Impact
Residential	76.87% Decreased
Agricultural	67.91% No Change
Commercial	64.55% Increased
Personal Property	72.76% Increased

In addition, the total revenue from actual levies was 93.08% of the revenue allowed under HB1150. This indicates some taxing authorities in St. Louis County voluntarily reduced their tax rates in 2003. Table 1.3 lists the percentage of actual revenue levied compared to the revenue allowed by HB1150.

**Table 1.3: Percentage of Actual Revenue Levied Compared to the Revenue Allowed by HB1150**

Subclass	Percentage
Residential	93.51%
Agricultural	89.32%
Commercial	92.37%
Personal Property	92.77%

## OBJECTIVE, SCOPE, AND METHODOLOGY

## **OBJECTIVE, SCOPE, AND METHODOLOGY**

### **Objective**

The objective of this review was to analyze the impact of the first year of implementation of House Bill No. 1150, Second Regular Session, 91st General Assembly.

### **Scope**

The State Auditor's Office is required by Section 137.073.6, RSMo, to annually review local property tax rates of all taxing authorities in the state to determine whether local governing boards have levied taxes in accordance with state law, and in particular, to determine whether local property tax rates have been adjusted to ensure that property reassessments are revenue neutral. The scope of this review was limited to determining the impact of the implementation of HB1150.

### **Review Methodology**

To review the impact of the implementation of HB1150, we reviewed the 2003 property tax rate calculation for the 268 levies in St. Louis County that were affected by the new legislation. This review excluded the 52 debt service levies in St. Louis County, as this calculation was not affected by HB1150.

Information from Appendix VI "Listing of Tax Rates for Local Governments Using HB1150" from our Review of 2003 Property Tax Rates report #2003-124 was obtained. This information includes the political subdivision name, purpose of levy, and assessed valuation, ceiling, and actual levy broken down by each subclass of property (i.e. residential, agricultural, commercial, and personal property).

The prior method ceiling was then calculated by taking the tax rate computed using the prior method from the tax rate forms and adding any election data or use of amendment 2 to the rate. This prior method ceiling is the maximum tax rate that could have been levied in 2003 had HB1150 not been implemented and each levy only calculated one tax rate.

For a basis for comparison, the revenue generated by the HB1150 ceiling, the prior method ceiling, and the actual levy for each subclass of property was calculated. The revenue generated is computed by multiplying the tax rate by the assessed valuation and dividing by 100. We then totaled the revenue generated by each levy by subclass to give the total revenue generated for the levy.

Each levy in Appendix I contains the following, so that the impact of HB1150 can be determined by levy:

- political subdivision name,
- levy purpose,
- HB1150 ceiling's assessed valuation, rate, and revenue for each subclass and the total revenue,

- prior method ceiling's assessed valuation, rate, and revenue for each subclass and the total revenue,
- difference in revenue due to HB1150 for each subclass and the total revenue (note: this is the impact of HB1150),
- actual levy's assessed valuation, rate and revenue for each subclass and the total

Each levy's data was totaled to produce the total revenue from HB1150 ceiling, prior method ceiling, and the difference in revenue allowed due to HB1150 for each subclass and the total. The percentage difference in allowed revenue was calculated by taking the difference in revenue allowed and dividing it by the revenue allowed by the HB1150 ceiling. The difference totaled by subclass and the percentage difference in allowed revenue indicates the impact of HB1150 by subclass and total revenue allowed.

The actual levy's revenue generated was also totaled for each subclass and the total. The percentage of total actual levy was calculated by taking the revenue generated for each subclass and dividing it by the total revenue for the actual levy. This shows the breakdown of which subclass is actually paying the most or least property taxes. Finally, the percentage of actual revenue levied was compared to the revenue allowed by HB1150. The percentage of HB1150 ceiling was calculated by taking the revenue generated by the actual levy and dividing it by the revenue allowed by the HB1150 ceiling for each subclass and the total. This was calculated to see if political subdivisions were levying their full tax rate ceiling allowed by HB1150 in 2003 or took voluntary reductions.

## APPENDIX
